

# Efraín Chacón Galindo

---

Mérida, Yucatán, México | 999 994 3965 | efrachaga@gmail.com

## Objective

To become a great full stack web developer by applying best practices and to never stop learning from experienced coworkers, while sharing my knowledge to anyone interested.

## Experience

### SIERRA VITA WEB PAGE | FREELANCE | JAN 2023

- I participated as a **front-end developer** in a team of 5 to create an e-commerce web page for Sierra Vita winery located in Guadalupe, Baja California. I built components like a carousel displaying the wines, a “z pattern” for the “about us” and “our process” section and overall, the whole home page with the ability to traverse it with automatic scrolling for a good **UX**, using **react.js**, **JavaScript**, **HTML**, **CSS**, and **Material UI**.

### WINE SUPPLY | TEAM PROJECT | NOV - DEC 2022

- We built a **responsive** (mobile first approach) wine ecommerce app using **typescript**, **styled components**, **react**, **redux**, **express** and **mongoose**. My primary role was **front end developer**. I was responsible for making the entire landing page, filter functionality, a checkout page with user’s address (google maps API), login functionality, among other things. Visit the repo here: <https://github.com/Wine-Supply/wine-supply-front>

### DOGGIE APP | INDIVIDUAL PROJECT FOR HENRY BOOTCAMP | OCT 2022

- The app consists of a full stack single page application using the Dog API. For the backend I used Node.js framework, **express**, to create endpoints to consume information and to post information that will store in a PostgreSQL database using **Sequelize**. For the frontend I used **HTML5**, **CSS3**, **React.js** and **Redux** to manage my requests to the backend. Used **react-router-dom** to navigate through the app using the **AJAX** (or **AJAX**) methodology. Visit the repo here: <https://github.com/ChaconEfrain/Dogs-API>

## 4 YEARS OF PROFESSIONAL EXPERIENCE

- I began to work in July 2018 in the photovoltaic industry and had my last approach to such field in August 2022 when I decided to dedicate my full time to programming. During those 4 years I acquired working experience with multidisciplinary teams, projects with a deadline, presentations to the client, and soft skills that can apply to any professional environment.

## Technologies

- **TypeScript**, **JavaScript**, **React.js**, **Redux**, **Node.js**, **Express**, **HTML5**, **CSS3**, **Sequelize**, **PostgreSQL**, **Git**.

## Education

### RENEWABLE ENERGIES ENGINEERING | AUG 2016 - JUL 2021 | UNIVERSIDAD AUTÓNOMA DE YUCATÁN

- During my studying path, I had my first approach to basic programming with **C++** language.

### FULL STACK WEB DEVELOPER | AUG 2022 – DEC 2022 | SOY HENRY BOOTCAMP

- 700+ coding hours with **JavaScript** language and other front-end and back-end technologies.

### THE COMPLETE JAVASCRIPT COURSE 2022 | APRIL 2022 – JUL 2022 | UDEMY PLATFORM

- A 65-hour course that goes from zero to expert with **JavaScript** language, taught by web developer, web designer and teacher, **Jonas Schmedtmann**.

### BUILD RESPONSIVE REAL-WORLD WEBSITES WITH HTML AND CSS | OCT 2022 – NOV 2022 | UDEMY PLATFORM

- A 37-hour course that focus on everything related to web developing and web designing with **HTML5** and **CSS3**., taught by web developer, web designer and teacher, **Jonas Schmedtmann**.
